VOLUME 3

BEVERAGE MENU

Chapter 3 of Synthesis - Story of Herbs

At Synthesis, every menu is designed around the ancient belief that food is medicine.

Herbs are not merely flavor enhancers; they are the soul of our cuisine — carefully woven into each dish to nourish the body, balance the senses, and restore inner vitality. From ingredients like American ginseng, cordyceps, snow fungus, to black garlic and osmanthus, we honor their traditional wellness properties while applying modern techniques to reveal their purity and elegance.

Each herb is chosen not only for its health benefits but also for its energy: to invigorate, to calm, to fortify. Through thoughtful pairing and gentle preparation, we preserve their essence, allowing diners to experience healing through taste, and to reconnect with the rhythms of nature through every bite.

At Synthesis, we believe that true indulgence is found when wellness and flavor are one.
